

# Grant Applications Available January 15th!

## Wisconsin DNR Runoff Management Grant Programs

*On January 15, 2005, applications will be available for two DNR grant programs that address polluted runoff, one of Wisconsin's (and the nation's) biggest water quality challenges. These two programs are the Targeted Runoff Management (TRM) and the Urban Nonpoint Source & Storm Water Management (UNPS&SW) Grant Programs.*

### GENERAL INFORMATION

#### **Who can apply for these grants?**

Cities, villages, towns, counties, regional planning commissions, tribal governments, and special purpose districts such as lake, sewerage, and sanitary districts are eligible to apply for (a) TRM grants in an agricultural or urban area, or (b) UNPS&SW grants to fund projects in urban areas.

#### **Application Deadline**

To be considered for funding, applications must be postmarked no later than April 15, 2005. Projects may begin on January 1, 2006. Both programs are reimbursement programs: applicants must pay 100% of project costs, then request reimbursement from the DNR for a portion of eligible costs.

#### **Project Selection**

Completed applications are scored based on factors such as fiscal accountability and cost-effectiveness, water quality, extent of pollutant control, extent of local support, and likelihood of project success. The score will be increased if there is a comprehensive implementation or enforcement program in effect in the project area. Both grants are competitive. The level of available funding will be determined by the state's 2005-2007 biennial budget process. Highest priority in selecting projects under these grant programs will be given to projects that implement performance standards and prohibitions contained in chapter NR 151, Wis. Adm. Code.

#### **Responsibilities of Grant Recipients**

Successful applicants enter into a contractual agreement with the DNR. Grant recipients must comply with program conditions, provide the local portion of the project costs, install all best management practices (BMPs) constructed under these programs and maintain them for 10 years. If applicants are providing these grant funds to private landowners, a similar contractual agreement is required between the applicant and the landowner.

#### **How do I get an application or request additional information?**

Download the application from the DNR web site: [dnr.wi.gov/org/water/wm/nps/grants/npsprogram.html](http://dnr.wi.gov/org/water/wm/nps/grants/npsprogram.html) or contact Kathy Thompson at (608) 267-7568 or via e-mail: [Kathleen.Thompson@dnr.state.wi.us](mailto:Kathleen.Thompson@dnr.state.wi.us). DNR Regional Nonpoint Source Coordinators are available to answer questions about the grant applications.

*Rain Gardens*

The DNR administers these competitive grant programs under chs. NR 153, 154 and 155, Wis. Adm. Code. Copies of these codes may be obtained at: [dnr.wi.gov/org/water/wm/nps/admrules.htm](http://dnr.wi.gov/org/water/wm/nps/admrules.htm).

#### **Grant Writing Workshops, Dates and Locations**

Four (4) half-day FREE workshops will be held around the state and will focus on grant writing tips, changes to the application materials, DNR staff introductions, and an overview of the TRM and UNPS&SW grant programs. To ensure that we have adequate materials for all attendees, please pre-register for one of the workshops by January 28, 2005, by contacting Kathy Thompson at (608) 267-7568 or via e-mail: [Kathleen.Thompson@dnr.state.wi.us](mailto:Kathleen.Thompson@dnr.state.wi.us).

Monday, February 7, 2005      1:00-4:15 PM  
DNR/UW-Extension/J. P. Coughlin Center  
First Floor Conference Rooms A & B  
625 East CTH Y/Sunnyview Road  
**Oshkosh**

Thursday, February 10, 2005      1:00-4:15 PM  
DNR-Havenswood Nature Center  
Check at front desk for room assignment  
6141 North Hopkins St.

#### **Milwaukee**

Tuesday, February 22, 2005      1:00-4:15 PM  
1st Floor Event Room  
Department of Revenue  
2135 Rimrock Road

#### **Madison**

Thursday, February 24, 2005      1:00-4:15 PM  
DNR-West Central Headquarters  
Conference Rooms 158 and 185  
1300 West Clairemont Avenue

#### **Eau Claire**

## TARGETED RUNOFF MANAGEMENT GRANTS FOR CALENDAR YEAR 2006

### ***What are Targeted Runoff Management Grants?***

Targeted Runoff Management (TRM) grants are provided to control polluted runoff from both urban and agricultural sites. The grants are targeted at high-priority resource problems. Projects funded by TRM grants are site-specific and serve areas generally smaller in size than a subwatershed. The grant period is 2 years, with a possible 1-year extension. The *maximum* cost-share rate available to TRM grant recipients is 70 percent of *eligible* costs, with the total of state funding not to exceed \$150,000.

### ***How can TRM grant money be used?***

TRM grants can fund the construction of agricultural and urban BMPs. In some cases, TRM grants can also fund design of BMPs as part of a construction project. Design services provided by the private sector are cost-shared by the state at the same rate as the BMP installation.

*Livestock Watering System*

Reimbursement by the state for force account work performed by municipal employees may be no more than 5% of the total project reimbursement. Land acquisition and design can be reimbursed provided the design and parcel appraisal are approved by DNR regional staff and the construction project is selected for funding. Some examples of eligible BMPs include detention ponds, livestock waste management practices, some cropland protection, stream bank protection projects, and wetland construction. These and other practices eligible for funding are listed in ch. NR 153 and s. NR 154.04, Wis. Adm. Code.

### ***What projects are not funded by the TRM Grant Program?***

TRM grants may not be used to fund the following:

- Projects to control pollution regulated under Wisconsin law as a point source. This includes activities to meet permit requirements for large

livestock feeding operations regulated under ch. NR 243, Wis. Adm. Code, and municipal or industrial activities to meet permit requirements under ch. NR 216, Wis. Adm. Code.

- Staffing and/or planning activities.
- Construction site erosion control and post-construction structural BMPs for new development.
- Projects that are not water quality based (such as projects to solve drainage or flooding problems) or for dredging projects.
- Agricultural projects within Priority Watershed project areas, unless a showing is made that the Priority Watershed funding is inadequate to cover the entire TRM project.

## URBAN NONPOINT SOURCE & STORM WATER GRANTS FOR CALENDAR YEAR 2006

### ***What are Urban Nonpoint Source & Storm Water Management Grants?***

Urban Nonpoint Source & Storm Water Management (UNPS&SW) grant funds are used to control polluted runoff in urban project areas. Funds are awarded for either planning or construction projects. The grant period is 2 years. Projects funded by these grants are site-specific, serve areas generally smaller in size than a subwatershed, and targeted to address high-priority problems.

An "urban project area" must meet one of these criteria:

- has a residential population density of at least 1,000 people per square mile;
- has a commercial or industrial land use;
- is a portion of a privately owned industrial site not covered by a WPDES permit issued under ch. NR 216, Wis. Adm. Code; or
- is a municipally-owned industrial site (regardless of ch. NR 216, Wis. Adm. Code, permit requirements).

Governmental units are eligible for a grant even if the governmental unit is covered by a storm water permit under ch. NR 216, Wis. Adm. Code.

### ***How can UNPS&SW grant money be used?***

UNPS&SW planning grants can be used to pay for a variety of planning activities. Eligible activities such as stormwater management planning for existing or new development,

*Detention pond construction*

related information and education activities, ordinance and utility district development and enforcement are cost shared at 70 percent. This year, the cap on the total state share for UNPS&SW planning projects is \$85,000. For a planning activity to be eligible for funding under this program, the project must currently be in an urban area or an area projected to be urban within 20 years.

Eligible UNPS&SW construction grant costs may include such projects as infiltration systems and storm water detention ponds, and shoreline and streambank stabilization. Eligible costs are cost shared at 50% up to a maximum of \$150,000. Design costs are also eligible as part of the total project costs and can be reimbursed at 50%. Design services provided by the private sector are cost-shared by the state at the same rate as the BMP installation. Reimbursement by the state for force account work performed by municipal employees may be no more than 5% of the total project reimbursement.

Construction projects involving land acquisition and permanent easements can be awarded up to an additional \$50,000 in cost-share funds (50% cost-share rate). If you are considering land acquisition as part of your project, please contact your Regional Nonpoint Source Coordinator for specific guidance.

***What projects are not funded by the UNPS&SW Grant Program?***

UNPS&SW grants may not be used to fund the following:

- Construction site erosion control and post-construction structural BMPs for new development.
- Projects that are not water quality-based, such as projects designed solely to solve drainage or flooding problems, and
- Dredging projects.

*Detention Pond with Safety Shelf*

*The Wisconsin Department of Natural Resources provides equal opportunity in its employment programs, services, and functions under an Affirmative Action Plan. If you have any questions, please write to Equal Opportunity Office, Department of the Interior, Washington, D. C. 20240.*

*Upon request, this brochure can be made available in other formats, such as Braille, large type, or audio tape. Please call (608) 267-7694 for more information.*
